KETAMINE & SPRAVATO® THERAPY

Rapid-acting relief for treatment-resistant depression, anxiety, PTSD & chronic pain delivered in a calm, medically supervised setting.

IV KETAMINE THERAPY (CASH-PAY)

- Traditional antidepressants can take weeks to work. IV ketamine acts on a different pathway, with many reporting relief within hours to days.
- **40-70% response rate** in TRD clinical studies
- **45 min** typical infusion time, monitored throughout
- **Cash-Pay pricing:**
  $350 Single Session |
  $1,200 4-Session Series ($300/ea) |
  $1,650 6-Session Series ($275/ea)
- **Add-ons:** Medical & Psychiatric **Screening**: $150 | Maintenance infusion: $300 | **Integration counseling**: Billed separately

SPRAVATO® (ESKETAMINE) NASAL SPRAVATO

- **FDA-approved** for Treatment-**resistant depression** (TRD) in adults (as monotherapy or with an oral antidepressant) and **depressive symptoms in adults with MDD with acute suicidal ideation** or **behavior** (with an oral antidepressant).
- **SPRAVATO® has not been shown to prevent suicide** or **reduce suicidal thoughts or behaviors** and does not replace hospitalization. **Only available through the SPRAVATO®) through the SPRAVATO® REMS program** & must be administered in **a certified healthcare setting** under **provider supervision**, with monitoring for at least 2 hours after.
- **Insurance may cover Spravato** (benefits checked during screening).
